

EAGLE ALLIANCE HQ

PROJECT TYPE

OFFICE

SITE + LOCATION

1190 Creek Road,
Carina Heights

PROJECT STATUS

DA approval

SERVICES

Town Planning
Architecture

HPC was charged with the design of Eagle Alliance's new office building and HQ, the flood constrained site was carefully considered to produce a design that responds to flood height levels, its prime aspects and its prominent location.

Carefully designed to mitigate any potential floods, the design adopts non-habitable ground floor uses such as parking facilities.

Focusing on providing a strong street presence, the use of glass and timber to the eastern facade was incorporated to draw the eye of passersby.

Users of the building enjoy light filled window bays, flexible open plan office space and a large entertaining deck to the north taking full advantage of the prime aspect.
