

PIMPAMA CHILD CARE

PROJECT TYPE	CHILD CARE CENTRE
SITE + LOCATION	Karingal Drive, Pimpama
PROJECT STATUS	DA
SERVICES	Town Planning Architecture

Pimpama child care, part of a subdivision in Pimpama that HPC have been working on, is located on a steep site. HPC provided for a profitable venture finding a balance between provision for children, open play space and regulatory requirements for parking and other facilities.

The design hinged on three aspects, light, colour and form. Carrying this concept throughout, a sense of cohesion emerges providing a device to reduce the mass of the building through the articulation of these features.

The reception offers a spacious focal point a meeting place for staff, students and parents alike. The building offers a unique opportunity for the children to learn through the interaction with their surroundings.
